Content and structure of information retrieval databases
Search strategies and search techniques
Information retrieval
Evaluating search result
Reference management
Copyright
Scientific/Scholarly publishing
Open Access

Reading list
See separate document.

Examination
The examination is individual and based on active participation in seminars, on tests and seminar assignments, and on the student's peer review contribution at the seminars.

Quality Assurance
Follow-up relating to learning conditions and goal fulfilment takes place both during and upon completion of the course. The results will be used as a basis when developing and planning future courses.
